

Application:

Glycol Ethers contain ether and alcohol groups in a single molecule resulting they are miscible with most liquids. The strong solvency & wide solubility for many compounds have established. It is also used as dye solvent in textile, leather and paint industries. Its versatility is illustrated by using as a solvent in pesticides and herbicides & also as a diluent for hydraulic fluids, brake fluid mutual solvent and coupler for soluble oil for hard surface cleaners.

Glycol Ethers are used in various types of surface coating formulation such as lacquer and enamel where it imparts gloss and improve the leveling characteristics with variety of liquids it is used as a coupling agent in the applied coatings. It is also used as solubility agent in various types of cleaners and cutting oils. Some Glycol Ether is used as a de-icing inhibitor in aviation industry and also used in mineral oil industry to recover the crude oil. These products are also used in manufacturing of drug and its inter medicines.

Glycol Ethers is widely used in the textile industry, particularly for dying and printing process. Glycol Ether is also recommended for printing with basic dyes, due to its no corrosive action. The presence of hydroxyl group in glycol ethers molecule makes them suitable for synthesis. The esters obtained from there are used plasticizer and solvent.

The information furnished in this pamphlet is according to our best knowledge and experience. However, no warranty is expressed or implied.

ADVANCE PETROCHEMICALS LTD also manufacture other product like Brake Fluid DOT 3 & 4, Antifreeze Coolant, PEG 200,200,...,4000, Tea 85% & 98%, Emulsifier, Demulsifier, MDEA, MMEA and other many chemical or custom made chemicals.
