

ROUND THE CLOCK, ROUND THE WORLD

Your Most Versatile Logistics Company

Logistics - Totally Simplified

www.goodrich.co

Company Profile

Goodrich story started in the year 1997, when the promoters of the company T. Venkataraman and R. Gopal incorporated a company called Goodrich Maritime Pvt. Ltd. in Mumbai, India. The objectives before the promoters were to provide Shipping Agency services to the Indian trade. In the 19 years' of its existence, this company grew in a formidable manner, to encompass within its scope, activities ranging from various spheres of shipping and logistics services.

It expanded geographically from a small presence in Mumbai to various ports and ICDs in India and overseas. Today Goodrich has a very strong presence in overseas locations like UAE, Singapore, Indonesia, Malaysia, Thailand, Kazakhstan, Afghanistan and the USA, and a cumulative employee strength of around 560 people. It is recognized by the Indian trade as "The Most Versatile and The Fastest Growing Logistics Company in India".

Aiming to be among the TOP globally too!

From a predominantly India-centric operation, Goodrich today has multiple global operations. The Goodrich Management has never believed in having an unlimited number of Group companies needlessly, but always believed in creating additional companies in the Group, with a clearcut strategy in mind. Sometimes geographical and at other times activity-oriented!

The highly proactive Directors of the Goodrich Group have been trailblazers and trendsetters. Working on a 24x7 basis, these leaders have propelled the Group to great heights over the last 19 years. This is evident also from the year-on-year growth in the top line and net profits of Group companies. So deep rooted are their innovative capabilities, that they could visualize that their dream could fade away if they do not introduce ingenious activities within their core competency and that was Shipping and Logistics.

There was a lot of thought and design in their approach. Today they are in a position to insulate and protect their profitability, from any untoward downward trend in one or a couple of their activities.

If their efforts have been tireless, their superbly trained and motivated personnel have taken a cue from them, to pursue the goals set by the Directors.

To achieve such an eminent place in the mercantile marine world, the sweat of the people's efforts was supported by an amiable office atmosphere and constantly enhancing the state-of-the-art IT infrastructure.

The parent company, Goodrich Maritime is already ISO 9001-2008 certified, and along the way the Dubai outfit Goodrich Maritime LLC has also been similarly accredited by DNV-GL. Goodrich is also moving towards other product specific certifications.

Corporate Social Responsibility

The Goodrich Group believes that business values mesh into broader values, that encompass corporates contributing to society at large.

The Group today focuses on improving the lives of the underprivileged in society, and undertakes programs to enhance literacy, generate employment, improve health services, promote gender equality and empower women.

SHIPPING AGENCY

Liner Agency

Goodrich has rich experience in Liner Shipping. The Group runs its own NVOCC services and also acts as agents at various locations in Asia, not just for its own services, but also for other NVOCC operators and liners.

This activity was Goodrich's first service offering, and continues to be of paramount importance not only in terms of revenue, but also integrates into and leverages the other activities of the Group. As a liner shipping service provider, Goodrich has a comprehensive presence in India, the UAE, Singapore, Malaysia and Indonesia. More countries have been earmarked, the prime amongst which are Saudi Arabia, Oman, Thailand and China.

In India, the Goodrich presence is all-encompassing; with the agency network covering all major ports and ICDs. This activity is conducted by Goodrich's own offices. The container throughput of Goodrich in India has grown remarkably over the years. It currently stands at 50,000 TEUs annually. Goodrich has tremendous capabilities within its Liner Shipping agency to canvas, book and effectively handle cargo of various sizes and types, including Dry Vans, Reefers, Specials and ISO Tanks.

All the equipment handled, is maintained to the principals' accepted standards. Goodrich's own M&R team keeps a 24x7 vigil over this activity. Quality depots chosen by Goodrich all over Asia, ably assist in this initiative.

Highly knowledgeable and motivated personnel in all vital departments like sales, customer service, operations, documentation and accounts, ensure absolute satisfaction among customers and principals alike.

Tramp Agency

Vessel husbanding at various port offices is carried out by Goodrich in India and the UAE. This will shortly be extended to other regions as well. Using its global network, Goodrich has developed excellent relations with various shipowners, who repose faith in the company to handle their vessels smoothly, with quick turnaround while at berth and with the most competitive of PDAs.

Services are also extended to world-renowned charterers, who are confident about Goodrich's abilities to efficiently care for their interests. Not just in adroit handling of their chartered vessels, but also for comprehensive post-sailing formalities. Goodrich's own reputation as a vessel owner and operator has held the company in good stead, in this business venture.

NVOCC OPERATIONS

After its foray into Liner Shipping as agents, the Goodrich Group made a very prudent move to commence its own container services. This was at a time where major liner operators were setting up their own agency outfits, to augment their income. This move immediately proved to be strategic, and was backed by the commencement of the NVOCC operation, by Vasco Maritime, a company registered at Singapore.

This segment grew in geometric proportions over the years, providing impetus to the Group's Liner Agency activity as well. From a few port-to-port sectors, the NVOCC business was expanded to cover the whole of Asia. This made it imperative for Goodrich to open several of their own offices in India, as well as overseas. The impressive growth results in this area, gave the Goodrich Group a negotiating edge in many related cost areas.

As the Vasco Maritime NVOCC business grew strategically, Goodrich was in a position to commence NVOCC services for other Group companies as well. The growth of these new service ventures complemented the existing one and further added to volume growth. What started off as our Dry Van (DV) based NVOCC services, expanded to other specialised equipment like Reefers, Flat Racks and Open Tops, which were added on.

Keeping in mind the fast-changing freight scenario globally, Goodrich Management thought it fit to integrate their NVOCC business into distinctive equipment-based services. While Vasco Maritime has been earmarked for DV operations, Goodrich Maritime LLC will be exclusively operating special equipment only. Personnel have been dedicated to render undivided attention to each of these companies' individual growth needs.

Cumulatively, the Dry Van fleet of the Group companies exceed 12,000 TEUs, and the increments are guarded keeping in mind industry conditions. To maintain a high degree of safety consciousness about the NVOCC activity of the Group, regular training of our personnel as well as agents is carried out, on various aspects of safety and appropriate documentation, to emerge as a quality service provider.

All the equipment and the Bills of Lading used are adequately covered by leading insurance companies.

CHARTERING & VESSEL OPERATIONS

Dry Bulk

Goodrich is a very active player in the sphere of chartering and dry bulk vessel operations. Within the short span of 5 years Goodrich has carried out substantial number of contracts not only in the international sea routes but also done coastal carriage in India.

Shipment sizes ranging from 5000 to over 75000 tons have been carried during the interim. Almost all sizes of vessels, right upto post-panamax have been chartered in, to do these fixtures.

As regards to cargo types, the Group has carried grain, ore, coal, aggregates, HBI (Hot Briquettes Iron) and DRI (Direct Reduced Iron), amongst other bulk cargo. This entire activity is conducted by Group company Goodrich Maritime DMC Est. based out of Dubai.

The Group is also involved in carriage of coastal cargo in India. Apart from spot cargo which is fixed for carriage from time to time, Goodrich is also involved in coastal contracts of affreightment (COA).

Liquid Bulk

After many successful years in the International markets of Dry Cargo Chartering and Liner Service, in 2015 Goodrich ventured into the Tank Chartering business consisting of a young team backed by experienced management.

We act as Independent brokers providing services to both owners and charterers on a no win, no fees basis. Our approach as independent shipbrokers is focused on expertise rather than the scale. Furthermore, the close cooperation with our offices in India, Dubai, Singapore, Indonesia, Malaysia, Thailand, Kazakhstan and U.S. has helped the tanker business.

In a nutshell our broking services are characterised by pro-active approach which is the hallmark of our success.

REEFER CARGO

What started off modestly in 2001 has grown multiple proportions today. A small fleet of 15 FEUs of refrigerated containers has grown to over 400 FEUs and some 20' containers as well.

A single trade lane between Nhava Sheva and the UAE in the initial phase has grown exponentially to cover the whole of Asia. Additionally this equipment also ventures out into East Africa, Afghanistan and CIS countries.

The Reefer services of Goodrich have evolved and expanded, due to bold initiatives. Examples of this are the development of a new trade lane, enhancement of the fleet, and setting up of an in-house technical upkeep team.

This team is fundamentally strong in back-up services, like a round-the-clock technical support on the spot, tracking and supervising inventory, to achieve quick turn-around of this equipment. An innate knowledge of the products, their seasonality and temperature requirements, have contributed in their own way.

Goodrich is among the few NVOCCs who maintain a regular supply of Reefer containers at various ICD locations across India.

Being fiercely asset driven, Goodrich has conducted this aspect of their business with self-owned equipment, which also lends an edge vis-a-vis competition.

Goodrich Maritime LLC based in Dubai is the Goodrich Company dedicated to operating this service.

BULK LIQUID LOGISTICS SERVICES

This activity has been the crowning glory of Goodrich for quite a while now. Besides having an international footprint, now it is being aggressively promoted in India as well.

The Goodrich Bulk Liquid Division has repeatedly won awards as the 'Best Bulk Liquid Logistics Service Provider' in the Unitised Segment in India. These awards were in recognition of the high standards of Goodrich's multi-product liquid logistics services.

Practically all facets of these services are offered by Goodrich in India, to standards that surpass customer expectations:

- Agency Services for International ISO Tank Operators
- In-house global ISO Tank Service
- Shipper-owned ISO Tank Management
- Leasing of ISO Tanks
- Domestic Carriage of ISO Tank
- ISO Tank Cleaning Services
- Chemical Storage and Distribution
- Food Grade ISO Tank Services
- Supply and fit of Flexi Tanks – International and Domestic
- Liquid Logistics Consultancy Services
- Gas Tanks Leasing

The highlight of our Bulk Liquid Logistics services, is the availability of an enormously knowledgeable and talented technical team, round the clock. Their years of experience have rendered them capable of serving the trade in terms of consultancy and emergency response.

Another highlight is the constant evolution of Bulk Liquid products. Every experience is clearly documented, deliberated and discussed with various suppliers, to enhance the quality of the product; yet at all times maintaining competitive pricing.

Regular training of our personnel by internationally recognised experts is another Goodrich hallmark. Our Bulk Liquid service products are available on a global basis.

Goodrich is the only tank container operator in India that is CDI-MPC compliant; giving the company a cutting edge amongst similar service providers.

CIS / AFGHANISTAN

However challenging the terrain may be, Goodrich is always there to provide value supplemented services to its customers. One such unique terrain is the CIS, comprising various states belonging to the erstwhile Soviet Union.

Services have been extended to following destinations:

- Azerbaijan
- Turkmenistan
- Tajikistan
- Uzbekistan
- Kazakhstan
- Kyrgyzstan
- Armenia
- Russia

Goodrich has well-knit services to all these locations, comprising of multi-modal transport formats. Often, a combination of sea route, with road and rail connectivity is used.

Over the last couple of years, Goodrich has developed tremendous expertise in this particular logistics segment, and is amongst the market leaders in India. The Group also provides similar services from its overseas locations like Singapore, Malaysia, Indonesia and the UAE.

Another Goodrich USP is that we can offer competitive rates on an SOC (Stock and Debit) basis; ably supported by our own Liner services. Our association with internationally renowned transport operators, each with their own individual strengths, gives us the ability to quickly and safely deliver cargo to the ultimate destination. Quite often traversing long winding routes, with unpredictable weather.

All routing options to the CIS are available to Goodrich. For example, through the Middle East, Finland, Latvia, Georgia, China, Pakistan and the Russian East Coast.

Time and again, our proven, in-depth knowledge about multi-border clearances and diverse local laws, have held us in good stead.

In recent times Goodrich CIS services has climbed notches over the competition, by the setting up of Goodrich Central Asia, a company registered in the CIS and now operating out of Almaty and Atyrau.

PROJECT CARGO & LOGISTICS

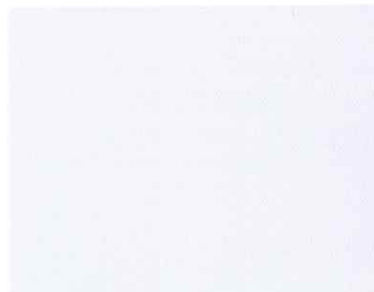

For over a decade, the Group has carried out Project Cargo Logistics through a dedicated company – Tricon Logistics, now called Goodrich Logistics Private Limited.

An impressive list of customers has found Goodrich to be very resourceful in this business segment as well. This is because Goodrich could meet their needs specific to Project Cargo Logistics. Our customers rely upon us as a dependable logistics partner, to provide equipment and vessels catering to cargo of all sizes and shapes, to various global locations.

Goodrich has repeatedly demonstrated this capability, and carried out turnkey projects for globally renowned companies.

"Passionate about projects" has been the motto of our Projects division. Keeping this in mind, the global offices of the Group have repeatedly proved how imperative their presence is, to ensure safe, sound, and timely delivery of any project consignment. Many times the scope of activities even in this segment, ranged from dismantling to installation.

Within a couple of months of commencement, the Goodrich office in Kazakhstan has already moved quite a few Project Cargo consignments.

OVER-DIMENSIONAL CARGO CARRIAGE

There has recently been high-velocity growth in the Group's commitment towards carriage of over-dimension cargo.

This growth is perceptible, considering the steep increase in the induction of additional special equipment, like Flat Racks, Open Tops and Hard Tops – both 20s and 40s.

What was earlier restricted to just Nhava Sheva, Jebel Ali and other Arabian Gulf ports, has now expanded to other locations in South East Asia, China, East and West Africa, other ISC ports as well as CIS locations.

The Group companies have pooled all such equipment, and created a global commercial management cell at Mumbai, to dedicatedly and professionally manage the entire fleet.

FREIGHT FORWARDING

This is one activity in the Group which is being fast-tracked, with accelerated momentum.

Goodrich conducts this business for sea freight, air freight and multi-modal transport. Practically all locations in the Goodrich network are active participants in this highly competitive segment.

The Shipping Liner background of the Goodrich Group, has enabled the growth of global Freight Forwarding. With its vast global network of offices and agencies, the Goodrich reach is truly global. With the recent acquisition of an Indian IATA company, air freight is poised to take wings and expand in geometric proportions.

The Group has tremendous rapport with main shipping liners, airlines and operators of other transport modes, guaranteeing optimum rates and services.

These and many other enviable attributes possessed by the Group, make global freight forwarding at Goodrich enormously successful.

Rather than just being a vendor with competitive freights, Goodrich renders customised end-to-end logistics solutions to all its customers.

WAREHOUSING

Alert to the fact that warehousing will form an integral part to any 3PL or 4PL activity, the Group is now gearing itself to identifying warehouses at strategic Indian locations, to augment its Logistics services.

The Group has already taken a substantial piece of land in the vicinity of greater Mumbai, to build a state-of-the-art warehouse, where the latest environment-friendly facilities have been planned. Amongst these will be a solar energy generating plant, and rainwater harvesting.

At Jebel Ali, Dubai, the Group has an existing warehouse leased from JAFZA (Jebel Ali Free Zone). This is currently being used for activities such as deconsol, storage and distribution, transloading and trading.

Currently plans are afoot to double the existing warehouse space at Jebel Ali. This activity is done by Group companies, Goodrich Logistics in India and Vasco Global in Dubai, in close co-ordination with other global offices.

AIR FREIGHT

With enormous success in ocean freight and other multi-modal logistics, Goodrich found it opportune late last year, to foray into the Air Freight segment.

An IATA company was acquired with all the infrastructure in place. Select locations in India have been chosen to kick-start the Air Freight activity. A dedicated team based in Chennai concentrates on the progress of this activity.

CUSTOM BROKING

The Goodrich Group carries out Customs Broking services at all major customs stations in India, with its own clearing license. This has taken the company to the cutting edge of versatility in logistics services.

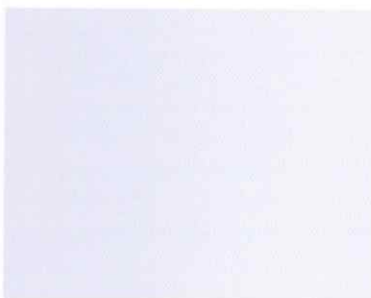

Duly licensed and knowledgeable personnel are available at all locations, to facilitate seamless clearance through customs, terminals, ports and airports. Similar facilities are present at overseas locations as well, particularly in the UAE.

LCL CONSOLIDATION SERVICES

For quite a while, this activity has been vigorously pursued from various Indian load ports and ICDs.

Invariably shipments to various Asian locations through hub ports at Jebel Ali, Singapore and Port Klang, are currently being catered to. Appropriate opportunities are actively being sought for further expansion of this business segment.

Unlike many operators, Goodrich Group companies go about this activity systematically, supported by their own Liner company and a sound insurance cover.

GCC TRANSPORTATION

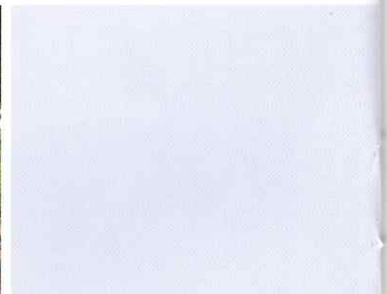

This is a unique product offered by the Freight Forwarding division of Goodrich in the Arabian Gulf. The proximity of various countries and their smooth accessibility by land routes, often proves to be a timely and cost effective solution to various customers within the Arabian Gulf region.

The Group company involved in this activity is Vasco Global Maritime (VGM), which conducts these operations on a daily basis, with owned and leased trailers and trucks. Even though the route is smooth, this kind of transportation has its own challenges. VGM has risen admirably to the task.

INLAND TRANSPORTATION

Goodrich has its own fleet of trailers, both owned and leased, to provide door delivery and ex-works services, including empty container movement, to interior locations and terminal transportation. Highly resourceful operations' personnel, ensure just-in-time services.

At various UAE ports, Goodrich not only provides similar services, but is also a serious player in GCC transportation.

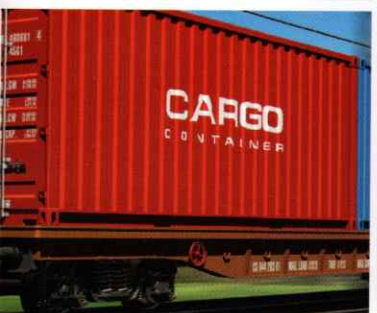

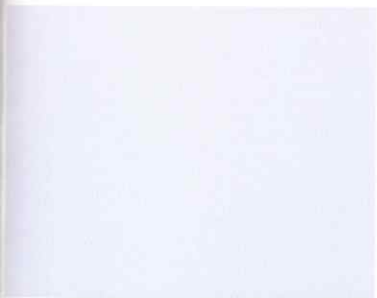

MULTI MODAL TRANSPORTATION

Both Goodrich Maritime Pvt. Ltd. and Goodrich Logistics Pvt. Ltd. are registered as Multi Modal Transport operators by the Directorate General of Shipping in India.

With a large presence at various ICDs, Goodrich connects both import and export containers from and to these ICDs, through various gateway ports to global destinations. A multi-modal transport document (MTD) with comprehensive insurance, is an integral part of this service.

FUTURE PLANS

Chemical Storage Facility

Our proposed Chemical Storage Facility will be strategically located at JAFZA SOUTH ZONE in Jebel Ali, which is the gateway trade hub for GCC, Africa, Iran, Iraq, Egypt, the Sub Continent and other countries. Our state-of-the-art facility will act as a one stop solution provider for storage, drumming, warehousing, heating, weighing and distribution of liquid as well as dry chemicals. The equipment used in this depot will be world class keeping in mind the highest of standards for safety and effluent treatment.

Our 22,000 sq. meter storage facility will carry necessary certifications as per International Standards like ISO 9001, 14000, CDI-MPC and SQAS. We will have a 80 TEU storage capacity of loaded ISO Tank containers and this will be a unique storage facility for loaded ISO Tanks outside the deep water port, Jebel Ali.

Our proposed facility can store IMCO Class products, classes such as 3, 4.2, 6.1, 8 & 9, all as per the local standards.

Contact us for a virtual tour of the facility.
