TECHASE has successfully developed the new generation of Sludge Dewatering Technology, Sludge Dryer Technology and best in class solution for solid suspended removal using Vertical Fiber Cloth Filter

Why Choose Us

- All-Round Pre-Sales Technical Support
- Professional Sales Service
- Quick Service Response
- Strict Manufacturing Quality Control
- Comprehensive Post-Sales Service
- Professional Service Team

All Product You Choose

- Lower Power Consumption
- Lesser Footprint Required
- Low Noise, Fully Automatic

24 Hour unattended operation

Multi-Plate Screw Press (Sludge Dewatering Machine)

01

1. Non Clog system.
2. Power consumption as low as.
3. Running speed optimised for various applications.
4. Exclusive Pre-Thickening device enables a wide Solid Concentration range from 0.3% to 5% Sludge Consistency.
5. Sludge pump and complete dosing system available in package

Vertical Fiber Cloth Filter

02

1. Alternate of Pressure Sand Filter.
2. Good Effluent Quality: SS<5mg/l, Turbidity<0.5 NTU.
3. Low head loss, only 0.2~0.3m.
4. Low energy consumption, 0.0001kwh per KL wastewater.
5. Reduction of BOD and COD

Continuous filtration, high efficiency,
No Backwash Time Required

Sludge Dryer

03

1. No. heat loss 100% Thermal.
2. Ultra Low Emission index, No Odor emission.
3. Operation Cost As Low as 180 KWH Per/Ton.
4. Low Temperature, Increased Safety, No dust hazard (NO Steam Required).

INCH ENVIRO TECHNOLOGIES PVT LTD.

We are located in Gurgaon | Jaipur | Ahmedabad | Bengaluru | Shanghai
